Time-Table Trouble!

stirchley baths

In the 1960s, money in Britain was different to the money we use today. Instead of only using pounds (£) and pence (p) we used **£-s-d** or **pounds, shillings and pence**.

This table shows you the names of coins found in old money, how much it was worth in the 1960s (**in d**) and how much that amount would be worth today (**in p**).

Coin	Amount in d	Amount in p	Totals
Farthing	¼d	0.1p	4 farthings = 1d
Half Penny	½d	0.21p	2 halfpennies = 1d
Penny	1d	0.42p	12 pennies = 1 shilling
Six Pence	6d	2.5p	2 sixpences = 1 shilling
Shilling	12d	5p	20 shillings = £1

Have a look at the copy of the **Summer Time-Table** issued by the Baths Department and answer the following questions. Please note, at this time, Stirchley Baths was known as Bournville Lane Baths.

CITY OF BIRMINGHAM - BATHS DEPARTMENT.
